

Step followed for Railway Booking Ticket Project (SSMS & SSRS)

❖ SQL Server Management Studio

Step 1 - Create a new database

```
CREATE DATABASE RailwayBookingDB
```

```
use RailwayBookingDB
```

Step 2 - Create 1st tables: PassengerMaster

```
CREATE TABLE PassengerMaster (  
    PNRno INT PRIMARY KEY,  
    Name NVARCHAR(50),  
    Age INT,  
    Sex NVARCHAR(10),  
    Address NVARCHAR(100)  
);
```

Step 3 - Create 2nd tables: AccountMaster

```
CREATE TABLE AccountMaster (  
    PNRno INT,  
    Amount DECIMAL(10,2),  
    TransactionID NVARCHAR(20),  
    TransactionDate DATE,  
    FOREIGN KEY (PNRno) REFERENCES PassengerMaster(PNRno)  
);
```

Step 4- Create 3rd tables: Journey_Details

```
CREATE TABLE Journey_Details (  
    PNRno INT,  
    DeparturePlace NVARCHAR(50),  
    ArrivalPlace NVARCHAR(50),  
    DepartureDate DATETIME,  
    ArrivalDate DATETIME,  
    BerthNo NVARCHAR(10),  
    TrainNo INT,  
    Class NVARCHAR(50),  
    FOREIGN KEY (PNRno) REFERENCES PassengerMaster(PNRno)  
);
```

- Check Table Structure

```
Select * From PassengerMaster
Select * From AccountMaster
Select * From Journey_Details
```

STEP 5: Insert Sample Data in all Table

```
-- Insert data in Passenger table -----
INSERT INTO PassengerMaster VALUES
(547298, 'Krish', 28, 'Male', 'Kolkata'),
(547300, 'klk', 26, 'Male', 'Indore'),
(547301, 'Riya', 25, 'Female', 'Mumbai'),
(547302, 'Aman', 29, 'Male', 'Delhi'),
(547303, 'Sneha', 26, 'Female', 'Indore'),
(547304, 'Raj', 25, 'Male', 'Patna'),
(547305, 'Pooja', 37, 'Female', 'Patna'),
(547306, 'Vikram', 26, 'Male', 'Chennai'),
(547307, 'Meera', 42, 'Female', 'Lucknow'),
(547308, 'Arjun', 20, 'Male', 'Kolkata'),
(547309, 'Nisha', 39, 'Female', 'Bangalore');

-- Insert data in Account-----
INSERT INTO AccountMaster VALUES
(547298, 1200.00, 'TC178267', '2017-06-08'),
(547300, 599.12, 'TC1000', '2025-07-10'),
(547301, 1402.37, 'TC1001', '2025-07-10'),
(547302, 658.24, 'TC1002', '2025-07-10'),
(547303, 687.4, 'TC1003', '2025-07-10'),
(547304, 1081.46, 'TC1004', '2025-07-10'),
(547305, 628.97, 'TC1005', '2025-07-10'),
(547306, 1043.54, 'TC1006', '2025-07-10'),
(547307, 1145.55, 'TC1007', '2025-07-10'),
(547308, 700.6, 'TC1008', '2025-07-10'),
(547309, 919.78, 'TC1009', '2025-07-10');

-- Insert data in Journey table -----
INSERT INTO Journey_Details VALUES
(547298, 'Kolkata', 'Patna', '2025-07-20 20:33:10', '2025-07-21 07:30:15', 'B3,56',
79216, '2AC'),
(547300, 'Patna', 'Lucknow', '2025-07-20 20:00:00', '2025-07-21 07:00:00', 'S5,12',
79000, 'Sleeper'),
(547301, 'Bangalore', 'Indore', '2025-07-20 21:00:00', '2025-07-21 07:00:00', 'B2,45',
79001, '2AC'),
(547302, 'Bangalore', 'Patna', '2025-07-20 22:00:00', '2025-07-21 05:00:00', 'B3,56',
79002, '3AC'),
(547303, 'Chennai', 'Mumbai', '2025-07-20 23:00:00', '2025-07-21 08:00:00', 'S1,23',
79003, '1AC'),
(547304, 'Chennai', 'Kolkata', '2025-07-21 00:00:00', '2025-07-21 09:00:00', 'S2,34',
79004, 'Sleeper'),
(547305, 'Chennai', 'Bangalore', '2025-07-21 01:00:00', '2025-07-21 08:00:00', 'S3,67',
79005, '2AC');
```

```
(547306, 'Kolkata', 'Indore', '2025-07-21 02:00:00', '2025-07-21 12:00:00', 'A1,78',  
79006, '3AC'),  
(547307, 'Jaipur', 'Bangalore', '2025-07-21 03:00:00', '2025-07-21 14:00:00', 'A2,90',  
79007, '1AC'),  
(547308, 'Indore', 'Hyderabad', '2025-07-21 04:00:00', '2025-07-21 14:00:00', 'C1,22',  
79008, 'Sleeper'),  
(547309, 'Bangalore', 'Chennai', '2025-07-21 05:00:00', '2025-07-21 15:00:00', 'C2,11',  
79009, '2AC');
```

STEP 6: Create View for Reporting

----- Create View for Reporting-----

```
CREATE VIEW vw_RailwayTicketReport AS  
SELECT  
    p.PNRno,  
    p.Name,  
    p.Age,  
    p.Sex,  
    p.Address,  
    a.Amount,  
    a.TransactionID,  
    a.TransactionDate,  
    j.DeparturePlace,  
    j.ArrivalPlace,  
    j.DepartureDate,  
    j.ArrivalDate,  
    j.BerthNo,  
    j.TrainNo,  
    j.Class  
FROM PassengerMaster p  
JOIN AccountMaster a ON p.PNRno = a.PNRno  
JOIN Journey_Details j ON p.PNRno = j.PNRno;
```

```
select * from vw_RailwayTicketReport
```

❖ STEP 7: Open SSRS & Design the Report in SSRS

• Add Data Source - DS_RailwayBooking

- Embedded Connection
- Type: Microsoft SQL Server
- Connection String: Connect to your RailwayBookingDB

- **Add Dataset - DT_RailwayBooking**

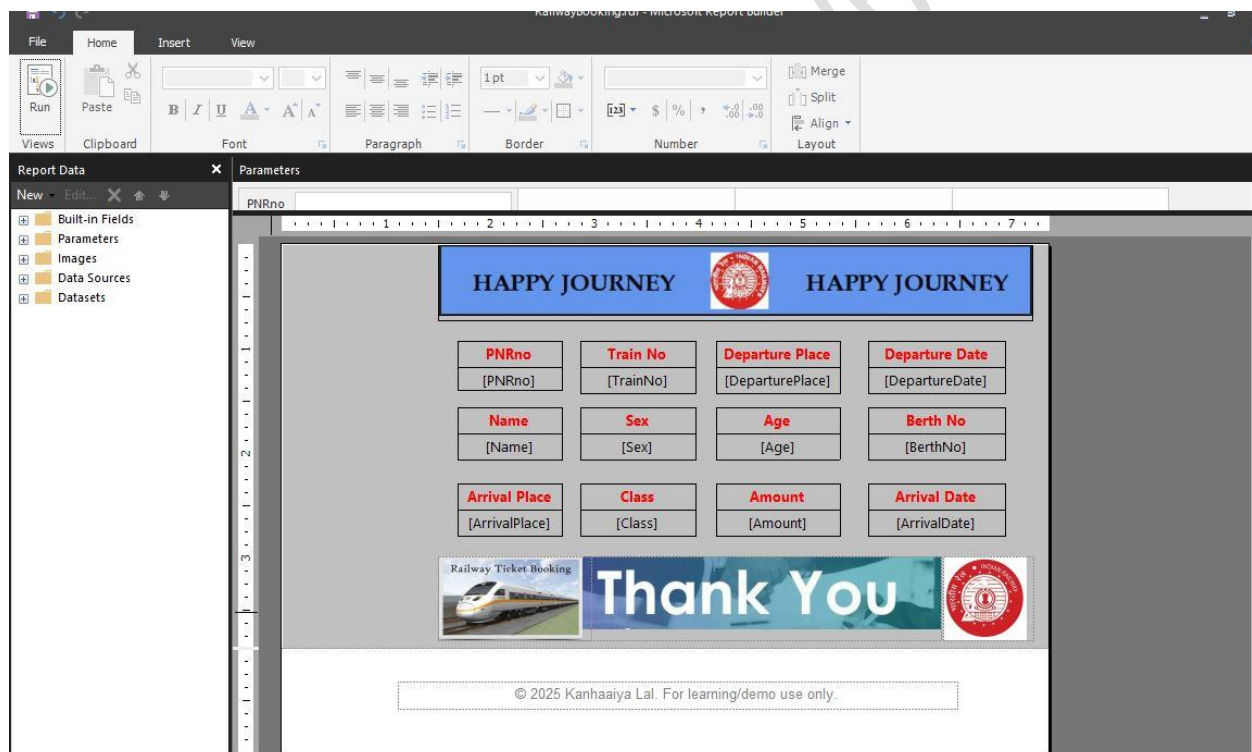

- Use embedded dataset
- Query:

```
SELECT * FROM vw_RailwayTicketReport WHERE PNRno = @PNRno
```

- **Add Parameter**

- Name: PNRno
- Type: Integer (because PNR will be number)

STEP 8: Design Report Layout with Table and image insertion and run

STEP 9: Preview and Export

- Click **Run**
- Enter PNR no 547298 to test
- You should now see a **ticket-like output**

File Run

Design Zoom First Previous 1 of 1 Next Last Refresh Stop Back Print Page Setup Print Layout Export Parameters Document Map Options

PNRno 547300

HAPPY JOURNEY		HAPPY JOURNEY	
PNRno	Train No	Departure Place	Departure Date
547300	79000	Patna	7/20/2025 8:00:00 PM
Name	Sex	Age	Berth No
klk	Male	26	S5,12
